

- They define tenant, domain, control-plane, canonical-state, regional, channel and identity vocabulary. Downstream technology choices should not silently decide these questions.

- ADR-053 is the only accepted V3 record shown. ADR-046-052 are accepted lab evidence; each requires explicit evaluation before it governs the V3 product.

- "Technology stack", "security" and "external systems" are portfolios of decisions. Allocate the next global ADR number only when one decision is written and proposed.
