

The diagram illustrates the Linebooker V3 Architecture Atlas, a hierarchical structure for system architecture documentation. It is organized into four levels (L1 to L4) with a central navigation path.

L1 - STAKEHOLDER LANDSCAPE AND ARCHITECTURE ENTRY POINT

- 0 Linebooker V3 Architecture Atlas** (graphical index, status map and navigation root, LB-V3-L0-01 · CURRENT) - start with the system landscape
- 1 System and Platform Overview** (participants, experiences, capabilities, platform and regions, LB-V3-L1-01 · HTML + PDF, AVAILABLE)

L2 - LOGICAL AND TECHNICAL ARCHITECTURE

- 2 Logical and Technical Architecture** (applications, services, messaging, workflow, data and deployment, LB-V3-L2-01, PLANNED) - zoom into logical construction

L3 - FOCUSED ARCHITECTURE VIEWS

- P Participant + Tenancy** (authority and membership, LB-V3-L3-01 · PLANNED)
- F Functional Domains** (tender to settlement, LB-V3-L3-02 · PLANNED)
- A Application / MFE** (shell and experiences, LB-V3-L3-03 · PLANNED)
- I External Integration** (contracts, APIs, adapters, LB-V3-L3-04 · PLANNED)
- N Messaging / NATS** (trust, accounts and topology, LB-V3-L3-05 · PLANNED)
- W Workflow / Temporal** (long-lived processes, LB-V3-L3-06 · PLANNED)
- D Data Architecture** (truth, history and documents, LB-V3-L3-07 · PLANNED)
- R Multi-Region** (cells, residency and recovery, LB-V3-L3-08 · PLANNED)
- S Security + Identity** (access, policy and audit, LB-V3-L3-09 · PLANNED)
- O Observability** (health, logs and traces, LB-V3-L3-10 · PLANNED)
- F Financial Architecture** (billing, currency and settlement, LB-V3-L3-11 · PLANNED)
- D Deployment + Services** (service and runtime model, LB-V3-L3-12 · PLANNED)

L4 - DETAILED DESIGNS

- N NATS contracts** (subjects + streams, L4 · PLANNED)
- W Workflows** (states + activities, L4 · PLANNED)
- D Data schemas** (models + retention, L4 · PLANNED)
- A APIs + adapters** (payloads + policies, L4 · PLANNED)
- D Deployment** (runtime + recovery, L4 · PLANNED)
- P Permissions** (roles + claims, L4 · PLANNED)

Navigation rule. Follow the tree until the diagram answers the question at hand; stop before unnecessary implementation detail. Solid blue denotes an available linked document. Dashed grey nodes are catalogue commitments, not completed designs. In the HTML edition, select the L1 card to open the current document.
